

닭고기 부산물을 이용한 양질의 가축사료 제조방법 및 설비
Chicken rendering to MBM

1. 기술 명칭: Chicken rendering(slaughter wastes recycling) solution for feed grade MBM (meat & bone meal) production.

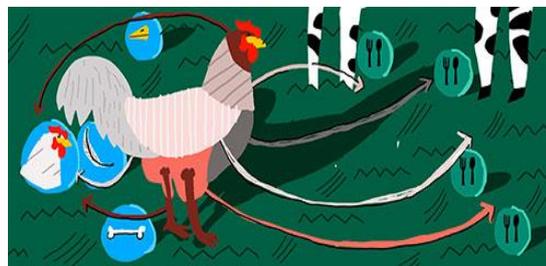

2. 기술 개요:

- Production performance of chicken harvester (slaughter line) is 6000 birds/hours per day.
- Weight of the chicken is 2,3kg
- Amount of wastes are:
 - Meat = 11,4%
 - Feather = 6,2%
 - Blood = 4%Total = 21,6%

Therefore we are in need to render about 24 tons of slaughter wastes per day. We need a solution at 12 or 24 hours work basis. Our aim is to produce feed grade MBM.

3. 적용 분야: Used as a vitamin-mineral supplement in feeding of cattle and small cattle, and pigs and poultry.

4. 거래조건:

- 1) Acquisition

5. 완성도

- 1) Production & Sale
